Following the financial crises in 2007, we have seen the intensification of neoliberal policies in education, with radical and potentially irrevocable shifts in the educational landscape, promoted under the auspices of ‘austerity’. This book highlights the central features of neoliberal education policies, their origins, recent developments and also their inherent weaknesses and flaws. It provides insights into the day to day realities and negative impacts of recent policies on the professional practice and work of educators, demonstrating how the changing conditions have led to de-professionalisation, alienation and a loss of professional autonomy and identity. The book also provides a set of accounts that detail the new realities emerging as a result of ‘austerity’ policies and questions the degree to which austerity has actually been developed as an ideological ‘cover story’ for the further monetisation and privatisation of public services.

The various chapters challenge the common assumption that the neoliberal project is a monolithic orthodoxy by highlighting its complexities, variations and contradictions in the ways policies are refracted through action and practice in different contexts. The book also challenges the common assumption that there are no viable alternatives to neoliberal education policies, and does so by presenting a range of different examples, theoretical perspectives, discourses and alternative practices. It is argued that such alternatives not only highlight the range of different approaches, choices and possibilities but also provide the seedbed for a reimagined educational future.
